

## **UW VETERINARY CARE**

UNIVERSITY OF WISCONSIN - MADISON

[UW Veterinary Care at the UW-Madison School of Veterinary Medicine](#) is in search of dedicated, motivated and enthusiastic **Certified Veterinary Technicians** to join our team. UW Veterinary Care is located on the campus of the University of Wisconsin in the heart of Madison, a community offering numerous cultural, recreational and educational activities. This is an excellent opportunity to utilize your skills in a progressive, state-of-the-art, fast-paced learning environment.

This is an advanced level position requiring extensive technical knowledge and skill, independence of action and cooperative team effort to meet the operational/ instructional needs of the [Critical Care Unit and Emergency Services of UW Veterinary Care](#) (UWVC). Position responsibilities require the individual to demonstrate initiative and the ability to make independent discretionary judgments that can affect the quality/outcome of animal life. Requires the ability to lift a minimum of 50 lbs. independently and physical and manual dexterity to perform specialized technical tasks.

Responsibilities may include but are not limited to:

- 1) Oversees and assures that high quality nursing care is administered and maintained in the primary care of animal patients.
- 2) Participates in instruction of veterinary students and training of veterinary technicians.
- 3) Monitors veterinary student participation in daily receiving schedules, initiates changes and lends assistance when needed.
- 4) Assists supervisor in problem solving activities and administrative tasks.
- 5) Participates and understands the importance of working as a team member within the hospital structure (i.e. communication with supervisors and faculty for enhancing productivity and quality patient care).
- 6) Demonstrates good interpersonal skills and the ability to effectively communicate proposed ideas and solutions.

The work is performed under general direction.
